

## Exploration of Sound Home Page

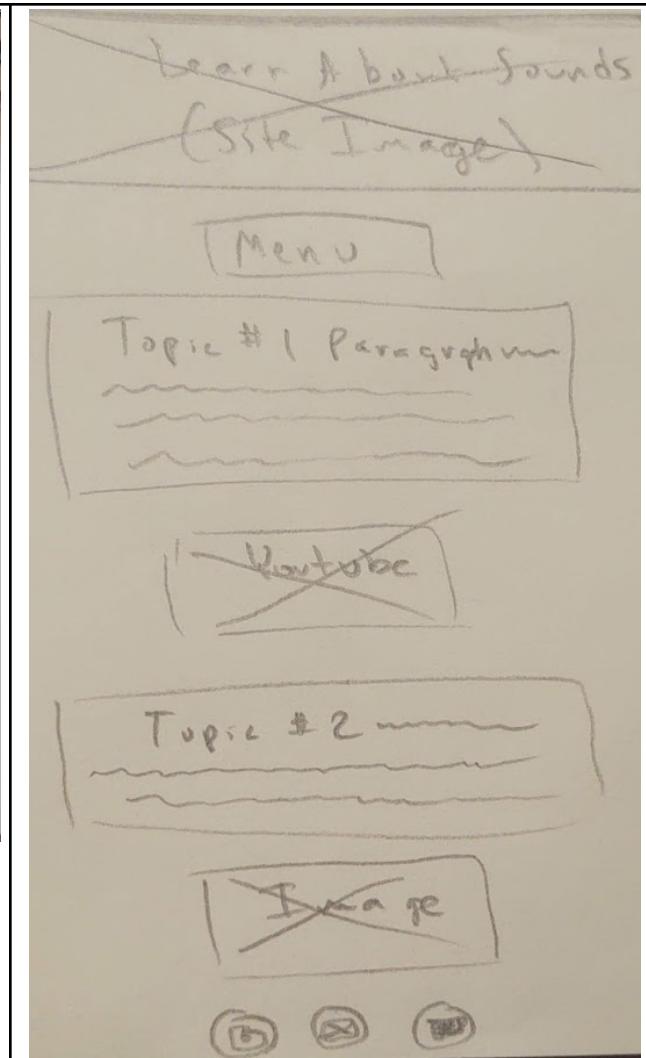

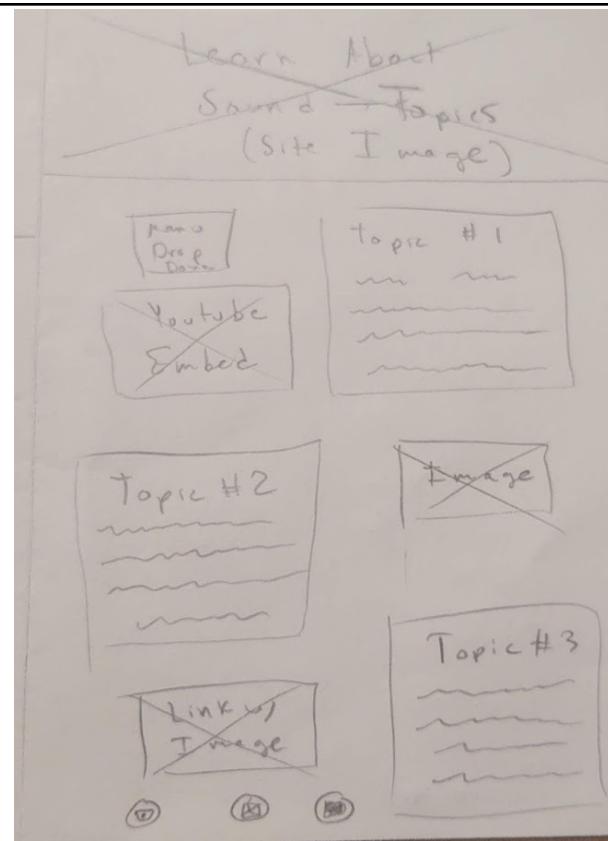

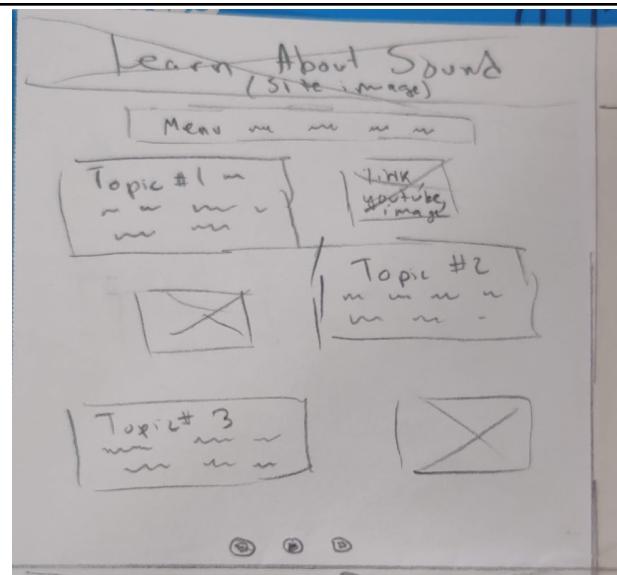

The desktop version of this is minimalistic and has a large vertical menu on the right hand side. The left side contains a site image that will be seen at the top of each successive page (except for the about me page), just in a different orientation. The mobile versions do not have the left/right split, but transition to a vertical orientation. They still maintain a large menu and do not drop down. The bottom contains social media links. This also remains on each of the successive pages.

## About Me Page

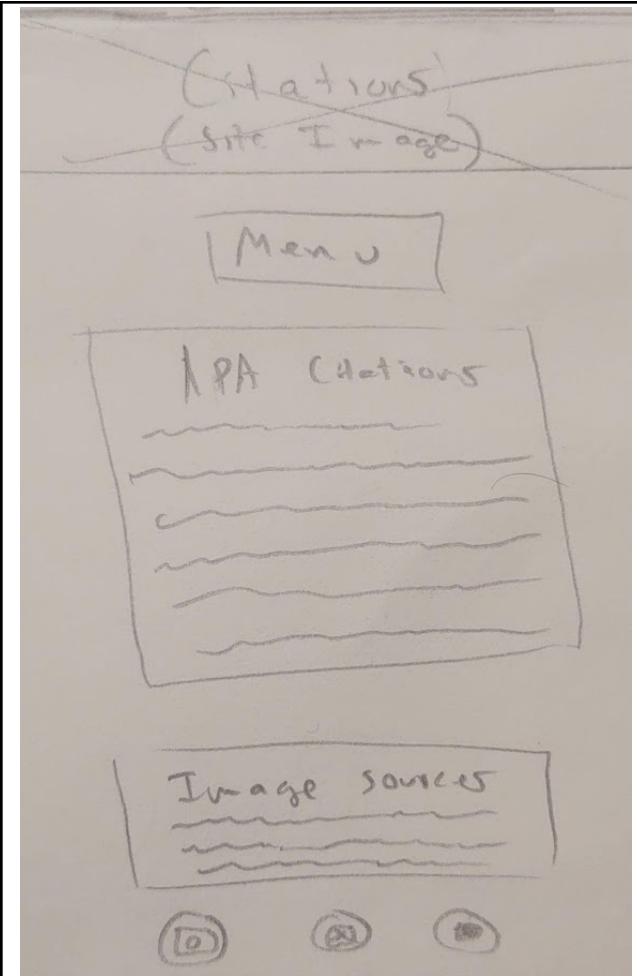

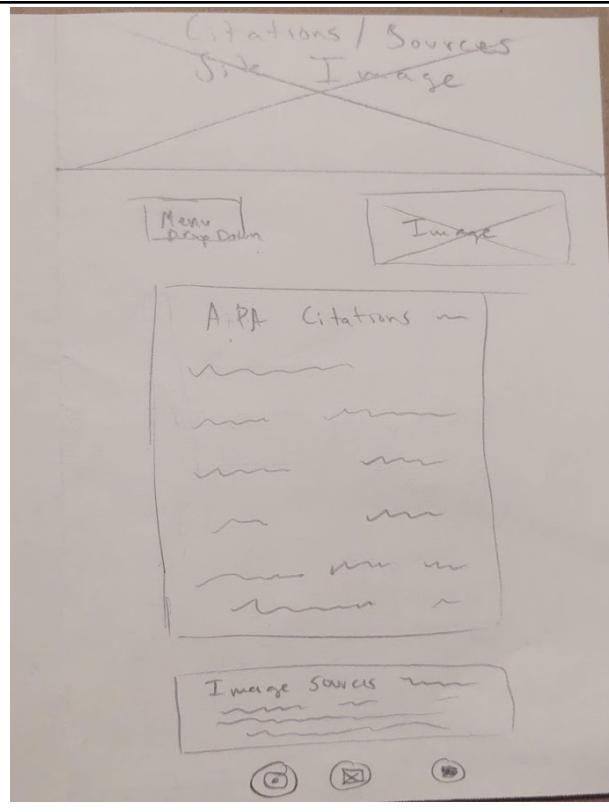

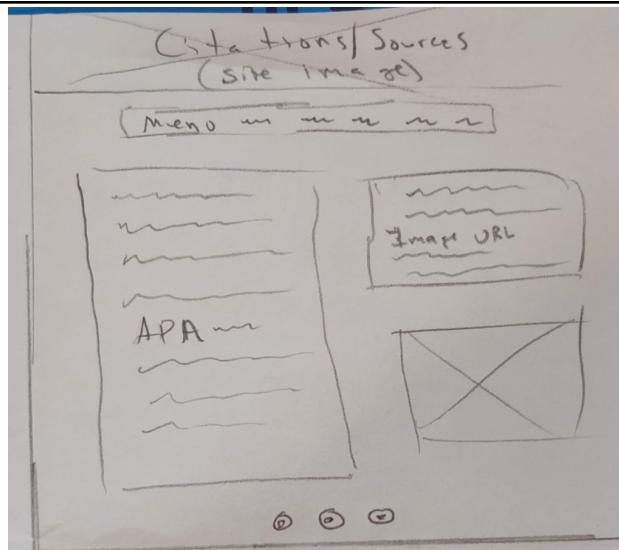

The desktop version is meant to be seen without scrolling, with a menu bar at the top. The site image that was on the homepage has been replaced on the "about me" page with a headshot. The header "about me" will be written in a layer on top of it. The mobile and tablet versions abandon this for a drop down button and the orientations vary slightly where the mobile version has a more vertical element with the quote above the embedded video.

## Learn About Sound: Topics

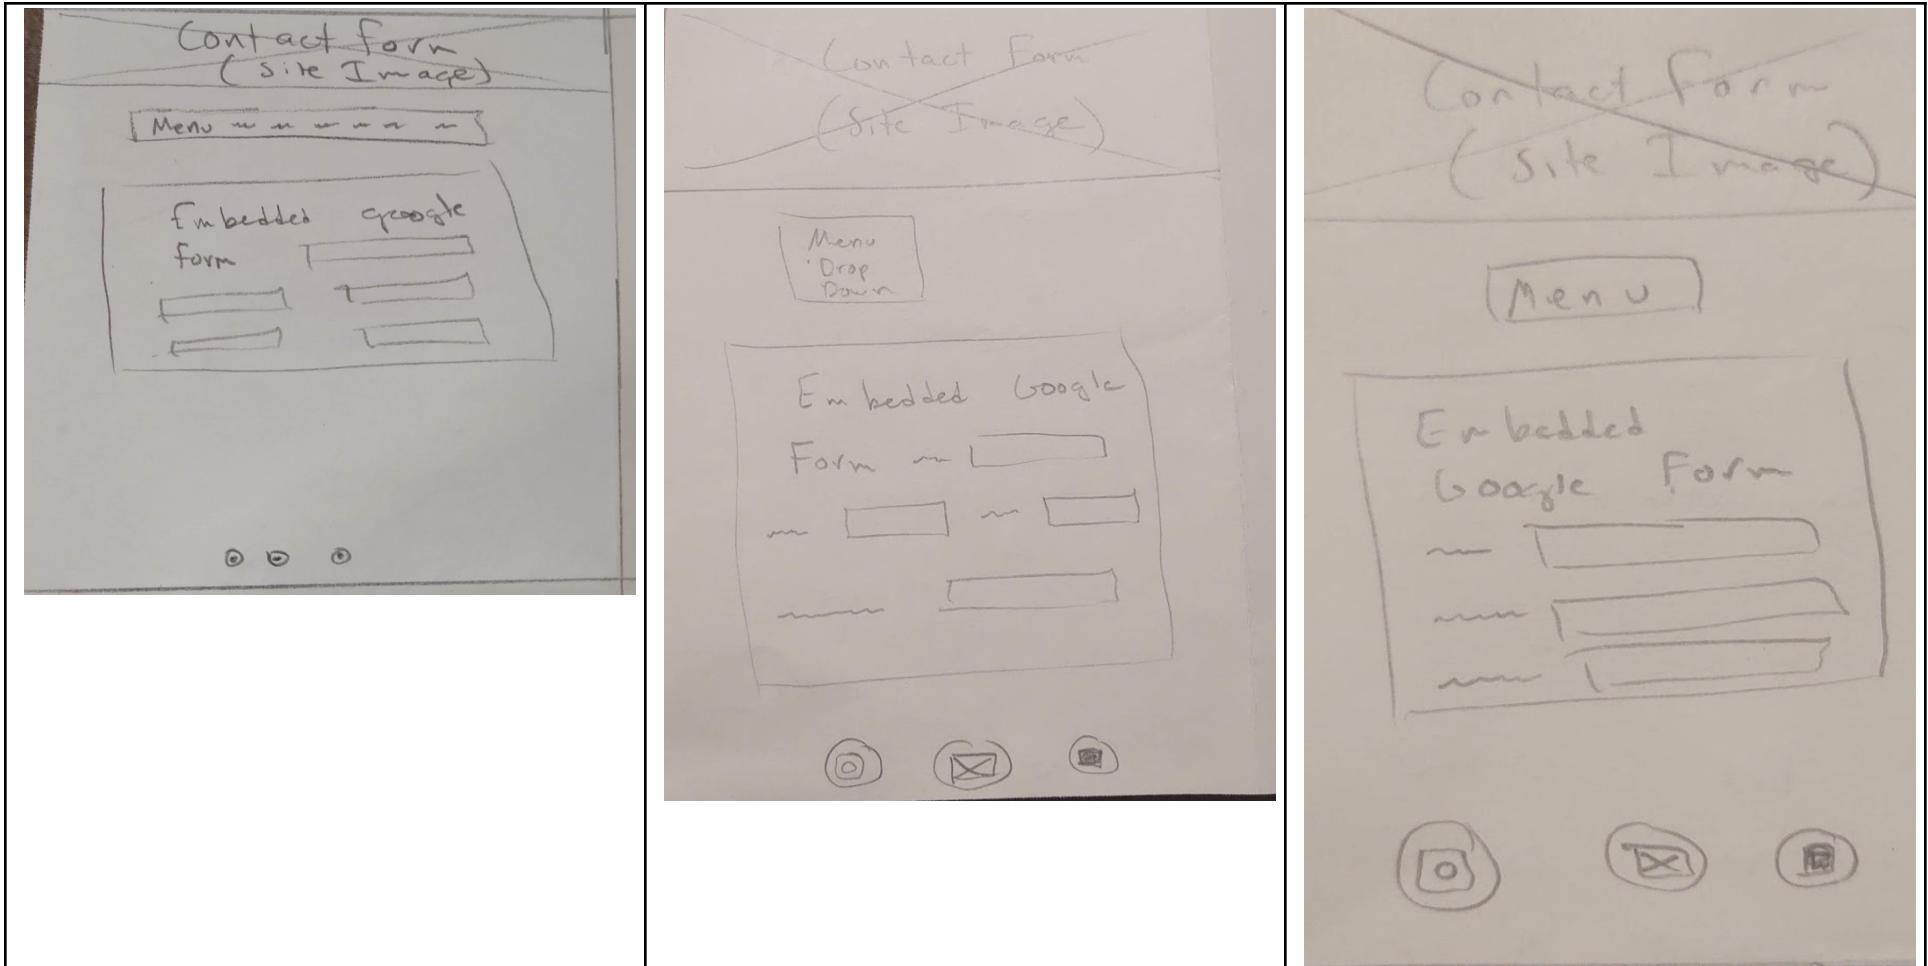

The learn about sound (content) page maintains the site image across the top. The menu bar in the desktop frame is a drop-down button in the tablet and mobile versions. The layout is going to be similar across all devices, but the mobile version will not have anything side-by-side. Because of this, I will probably add "return to top" functions and a navigation bar at the top to access material that would need to be scrolled to.

## Site Sources/Citations

The citation page for the desktop version is going to be horizontal with a menu bar. The mobile and tablet versions will be successively more vertical.

## Contact Form Page

The Contact page again has the site image with the header layered on top, menu bar, and an embedded contact form. The tablet and mobile pages will basically be the same but with a drop down menu.
